

# Oladimeji Onatunde

437-855-1725 | [dejionatunde@yahoo.com](mailto:dejionatunde@yahoo.com)

---

Dynamic and detail-oriented Full Stack Developer with over 6 years of hands-on experience in crafting high-performance, responsive websites for a diverse range of clients. Proven expertise in modern web technologies, including HTML, CSS, and JavaScript, along with robust design skills in tools like Photoshop, Illustrator, and Figma.

Adept at translating business requirements into functional, aesthetically pleasing web pages and applications. Highly skilled in React, Vue.js, and Node.js, with a strong background in content management systems such as WordPress, Joomla, and Drupal. Committed to delivering secure, accessible, and SEO-friendly solutions. A collaborative team player with a track record of supporting production issues and improving code quality through meticulous debugging and optimization.

## Skills

**Languages and Frameworks:** JavaScript (React, Vue.js), Node.js (Express.js), TypeScript

**Data Management:** MySQL, MongoDB, PostgreSQL

**Content Management Systems:** WordPress, Joomla, Drupal, Contentful

**Continuous Integration, Deployment, and Delivery:** Docker, Jenkins, Kubernetes, Git, Bitbucket

**Design Tools:** Photoshop, Illustrator, Adobe XD, Figma

## Experience

### BMO Financial Group

*Front-End Developer, Toronto, Canada, August 2022 – Present*

- Designed, developed, and maintained new pages and modules using React.js, Next.js, and Contentful, expanding my proficiency in modern JavaScript frameworks and CMS tools.
- Developed and maintained both front-end and back-end components of financial web applications
- Partnered with the Product Design team and other cross-functional teams to redesign and develop modern web pages and components, improving my collaborative skills and modern design techniques.
- Worked closely with Digital Managers and stakeholders to define, analyze, and deliver business and customer needs, enhancing my analytical skills and understanding of user experience. Played a key role in implementing solutions and testing applications to ensure they met the required specifications.
- Addressed production issues by performing root-cause analysis and diagnosis independently, which sharpened my problem-solving and debugging skills. Provided timely resolutions to software issues, ensuring minimal disruption to business operations.
- Ensured adherence to best practices for security, accessibility, SEO, and other essential areas, which deepened my knowledge of industry standards and compliance. This included syncing code between development and testing environments using GitHub for effective code distribution and version control.
- Maintained and updated existing investment and insurance pages, fixing bugs and adding new components, furthering my experience in site maintenance and iterative improvement.

- Collaborated with team developers to brainstorm digital solutions, enhancing my teamwork and innovative problem-solving abilities. This included close collaboration with cross-functional teams to ensure the successful delivery of projects.

## **Unlock DeFi**

*Software Engineer, New York, USA, October 2021 – June 2022*

- Designed and implemented complex, responsive user interfaces for crypto and DeFi applications using React.js, TypeScript, and Next.js, ensuring a seamless user experience across devices.
- Integrated Solana blockchain functionalities into the frontend, enabling users to interact with decentralized applications (dApps) securely and efficiently. Managed wallet connections, transaction handling, and real-time data fetching from the blockchain.
- Optimized frontend performance by implementing code-splitting, lazy loading, and other advanced techniques, resulting in a 30% improvement in page load times and overall application responsiveness.
- Worked closely with UX/UI designers to create intuitive interfaces, implementing feedback loops to continually improve user interaction and engagement within the crypto ecosystem.
- Led code reviews, mentored junior developers, and enforced best practices in frontend development, including writing clean, maintainable code and implementing unit and integration tests.
- Ensured frontend security by implementing best practices for protecting user data and preventing common vulnerabilities such as XSS, CSRF, and phishing attacks.
- Collaborated with cross-functional teams, including blockchain engineers, backend developers, and product managers, to deliver cohesive and innovative features aligned with business objectives.
- Set up and maintained CI/CD pipelines for frontend applications, ensuring rapid and reliable deployment. Monitored production systems for performance and usability, leading efforts to troubleshoot and resolve issues as they arose.

## **Transformative Tech Academy**

*Software Engineer, California, USA, February 2021 – October 2021*

- Developed, structured, and implemented a web application used by thousands of users, enhancing my skills in large-scale web application development.
- Built the blog and ecommerce part of the web application using Wordpress and Woocommerce plugin.
- Collaborated with project managers and creative teams to deliver efficient solutions, improving my ability to work within diverse teams and deliver innovative solutions.
- Managed a team of 5 developers and designers; trained and mentored other web developers, which strengthened my leadership and mentoring capabilities.
- Conducted market research and reported findings to the project manager, refining my ability to understand market trends and integrate them into project planning.

## **Ecoshield Nigeria Limited**

*Web Developer / IT Officer, Lagos, Nigeria, September 2017 – January 2021*

- Managed technology services to meet operational requirements, broadening my understanding of IT operations and their impact on frontend development.
- Maintained the company website and social media platforms, improving my skills in content management and digital marketing integration.
- Designed marketing materials such as flyers, posters, and business cards, which enhanced my graphic design skills and understanding of visual communication.
- Installed and configured computer hardware, software, networks, printers, and scanners, which expanded my technical support skills and knowledge of IT infrastructure.

## **Education**

### **Federal University of Agriculture, Abeokuta.**

*B.Sc Microbiology (2008-2012), M.Sc Environmental Microbiology (2014-2016)*
